

MSL rover class reference

Instructions:

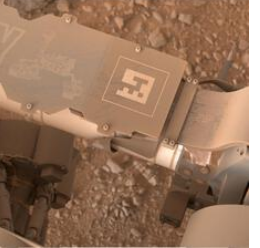

- (1) Assign one class label per image, based on what is **dominant**.
- (2) Rover parts are divided into groups based on their location on the rover:
 - a. **Turret:** the cluster of instruments on the end of the rover's arm
 - b. **Arm:** parts of the rover's arm
 - c. **Front:** instruments attached to the front of the rover body
 - d. **Mast:** instruments on the mast (rising above the rover body)
 - e. **Deck:** instruments on the rover's deck (flat top of the body)
 - f. **Wheel:** parts of the rover's wheels

Turret group:

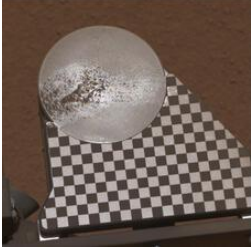

Turret: View of the turret, with no particular instrument distinguished.	
DRT: The Dust Removal Tool (brush); may be viewed from different angles.	
Drill: Rotary drill used to dig into rocks.	
Scoop: Small scoop used to collect samples.	

<p>MAHLI: Close-up camera with a half-circle cover that may be open or closed.</p>			
<p>Portion tube</p>			

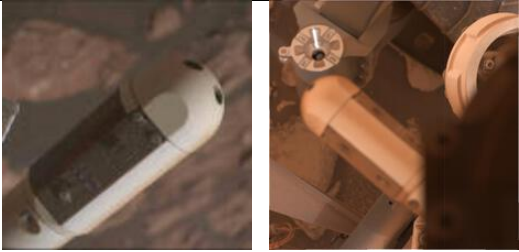

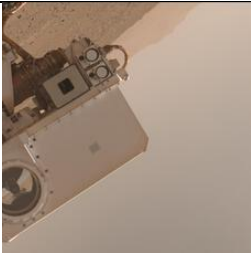

Arm group:

<p>Arm cover: Protects arm from dust; marked with the word “CURIOSITY” and an icon of the rover.</p>			
<p>Arm joint: nested cylinders that allow the arm to pivot on its elbow or shoulder. Only select this class if it is the dominant item in the image (otherwise use the natural feature type of the surface).</p>			
	(arm joint)	(outcrop)	

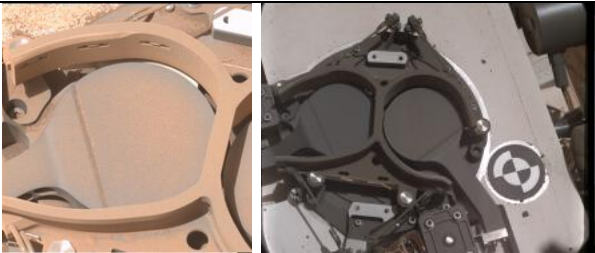

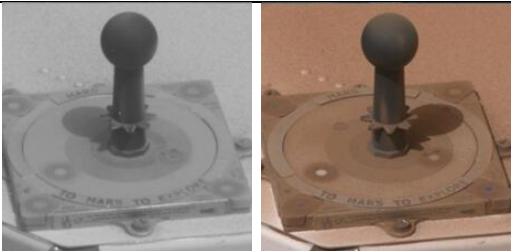

Front group:

<p>Observation tray: Where drilled/scooped rock samples are delivered for analysis by the APXS.</p>			
--	---	--	--

Mast group:

<p>REMS wind sensor: Small cylinder sticking out from the side of the rover's mast ("neck").</p>		
<p>Mastcam: Two (square) cameras mounted at the bottom of the mast. Pictures are often rotated since they are taken with the MAHLI instrument on the arm.</p>		

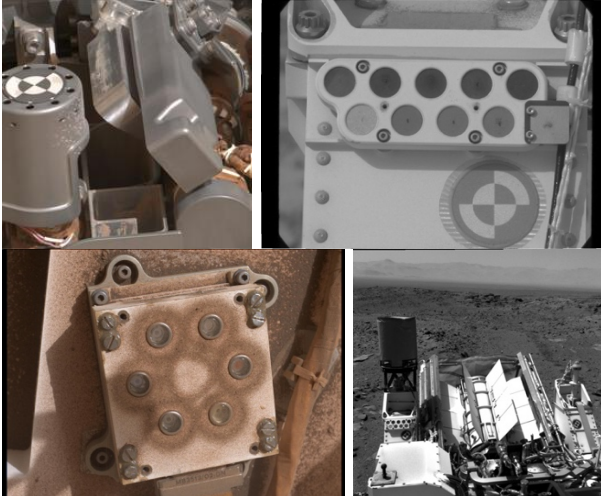

Deck group:

<p>SAM inlet: Port with two openings (but only one may be in view) with paddle-shaped covers.</p>		
<p>Mastcam cal target: "Joystick" shaped black post above calibration colors and words.</p>		

Wheel group:

<p>Wheel: One of six rover wheels.</p>	
<p>Wheel joint: Use only if it is the dominant item (e.g., occludes wheel); otherwise use the natural feature type of the surface).</p>	 <div data-bbox="695 751 862 783">(wheel joint)</div> <div data-bbox="976 751 1089 783">(ground)</div>

Other rover part:

<p>Rover parts not included in any other class.</p>
